Dear Prospective PMC-80 Owner:

Enclosed find a flyer in response to your inquire on the PMC-80. I have just opened a computer shop in Tucson and will be featuring the PMC line of products. If your are still intrsted in buying a computer please read the comparison between the PMC-80 and the other computers. I hope you will be as impressed as I was between capabaties and prices. As an introductory offer I am going to offer the PMC-80 for the price of \$575.00. I invite you to come buy and inspect the PMC-80 and to meet me. If you are out of town and would like for me to ship you the computer I would be glad to do so; please enclose a check or money order for \$575 (650 with upper/lower case modification installed) + \$34 (\$39mod) tax and \$10 for shipping and handling (total \$619, \$699 with mod) to THE AFFORDABLE COMPUTER SHOP and I will send the unit to you by UPS.

Since I am new in the business I would also like to start a mailing list. If you would like to be on that list drop me a line or give me a call and I will keep you informed of new developnents as they occure. Here are some of the services I now offer and plan to offer in the future. Along with the PMC-80 I have the Upper/lower case mod and adapter cable to the expansion interface. I am offering a quality C-20 tape at 1.50 (compare that to Radio Shacks 3.50) each or 12.50 for 10. I have two programs ready for sale, the first a grade book for teachers (again you have to compare this one to either Radio Shacks or Instant Softwares to appreciate it) wich sells for 24.95 and a test maker for teachers to make up multiple choice tests which sells for 14.95. Both are designed for 16K level 2 (please indicate disk or cassette and add 1.00 for shipping). I am also doing upgrades and will add memory to either your CPU or interface unit for \$75 per 16K.

Future plans are; first to increase our line of programs, next will be an adress book and a series of electronic practice questions for those who want to learn electronics or practice for FCC testing. I plan in the near future to add an expansion interface to my line and expect some exciting news in this area in the very nearr future. I am in negotiations with several companies for disk drives and diskettes.

To end let me emphasize my goal, that is to provide service and products to the 80 user at a fair price without the hassle the major company in this area is famous for. If you know of anyone who is intrsted or who would like to get on my mailing list please pass this on to them and have them contact me.

Notes: 1. If you plan to come by please call before hand to make sure I am here and I have the product on hand you want to see.
2. Please allow one week for personal checks to clear the bank.
3. Dont forget shipping on your order: \$10 for the computer, \$1 for other items.

Thank you

Saul H. Jacobs

November 10 1980

Fellow Computer Enthusiasts

I am sending you our first catalog even though you may have not asked to be put on our mailing list. For those of you who have purchased from us in the first few months of operation we appreciate your business and assure you that we will be here for your continued support. I promise that those of you who do not wish to be bothered will not receive any more communications from you after this but I did want to let you know we are still here and are growing.

I would also like you to know a little about myself and what my plans are for this new business I have just started. First I have been in electronics for 30 some years now professionally and have become an adment computer enthusiast in the last several years. At the present time I am teaching electronics for Pima Community College part time and running this business full time. I believe that to be succesfull in anything a person has to be dedicated and stand by what they say. This is the basis I am using for this business. First we are not in this to make a fast buck, in fact at this time we are just about breaking even. I have been living in Tucson at the same place for the last eleven years and am not about to sell you something today and be gone tomorrow. Second I am not in this to make a fortune, the prices I charge are discounted as far as I can and still making a living out of this. Third since I beleive a man's name is his fortune, I am offering only what I consider to be the best dollar for dollar value on the market. Finally I pledge to support all computers and other items I sell.

Let me restate our goals and policys:

1. To offer the lowest practical prices
2. To provide support on all items sold
3. To be here tommorow if you have a question on what you bought
4. To carry only the items that will give you the best dollar for dollar value.
5. To personly insure that all items sold are of the quality advertised

You will notice that even though we are advertising a wide range of computers, the concentration is on the PMC-80 and the Atari 800. The catolog is made up mostly from these two computers. The reason this was done was that most of our customers want a personal computer and we feel these two are the best dollar for dollar value. If you are intrested in a system for your business, small or large we have PET, DYNABYTE, NORTHSTAR, EXIDY and others please write or call and information on those systems will be forthcoming.

Let me conclude with the reasons we are concentrating on the PMC-80 and ATARI 800. First I beleive the PMC-80 is the most affordable

computer offered today. For \$575 you can be up and runing with a computer with enough RAM to do some programing with. The APPLE has for many years dominated the market for those who wanted a more sophisticated computer, and have acted that way. I beleive that ATARI is offering a computer as good if not better than the APPLE at better prices and offering more support. Compare the specifications, prices and software between the two and you will see what I mean.

We accept Mastercharge, Visa, personal or certified checks

Allow one week for personal checks to clear

If item ordered is on hand it will be shipped the next day if there will be over a one week delay you will be notified

Arizona residents add 4% tax Tucson residents add 6%

Shipping through UPS add \$5.00 shipping charge

Thank you:

Saul H. Jacobs

THE AFFORDABLE COMPUTER SHOP OF TUCSON INTRODUCES

"THE NEW GUY IN TOWN"

COMPARE IT WITH THE OTHERS THEN CALL SAUL AT 790-5352

Personal Micro Computer (PMC-80)

The PMC-80 is a new addition to the popular TRS-80 Model I line by Radio Shack. The PMC-80 has 12K bytes of RAM and the complete Level II 12K BASIC ROM by Microsoft. That makes it 100% software compatible with programs from Radio Shack and from the hundreds of other independent suppliers. The built-in cassette player reads standard Radio Shack programs for the TRS-80.

FEATURES

- Software compatible: Level II BASIC and SYSTEM tapes
- Hardware compatible with PMC 40-pin Interface Adapter
- Video output for both TV monitors and TV set (ch. 3)

The PMC-80 is also compatible with any of the many peripheral devices made and sold by independent suppliers. It is designed to play like the TRS-80. Most importantly, the Interface Adapter permits expansion of the PMC-80 with memory modules up to 128K to be added. An Expansion Interface will also permit the addition of Radio Shack compatible 5 1/4" disks and disk operating systems, RS 232, printer, etc.

- Unitized construction - just plug into power outlet and TV
- Integrated cassette recorder has automatic off-line control
- Complete operating instruction and programing manual

OPTIONS

1. **FASTLOAD** Cassette Interface System. Searches by name and loads standard Level II BASIC or SYSTEM cassette tapes 16 times faster at 8000 baud. (Includes Option 3)
2. **Upper/Lower Case Modification.** Compatible with two popular word processor software packages: Electric Pencil by Michael Shrayer and Scripsit by Radio Shack.
3. **Interface Adapter.** Converts PMC-80 50-pin bus to standard 40-pin bus for connection to Radio Shack TRS-80 peripherals.

90-day warranty period. Units may be returned for free repair or replacement within 90 days of shipment for any defect in material or workmanship. One week turn around provided.

SPECIFICATIONS

- **Memory** 16K bytes RAM externally expandable to 48K
- **Basic Interpreter** 12K Level II by Microsoft provides software compatibility
- **Cassette** Built-in, loads all Level II programs with automatic volume control
- **Display** Remote control disconnect switch permits manual control
- **ASCII character set** TV Monitor TV Modulator (CH3)
- **Text format** Upper case standard, lower case optional
- **Graphics** 64 x 16 or 64 x 16 in 2 pages (expanded character for TV set)
- **Power supply** 128 x 48 or 64 x 48 in 2 pages
- **Interface** Self-contained and fused
- **Size** 50-pin bus to S-100 chassis or 40-pin for TRS-80 peripheral compatibility
- **Size** 21 1/4 x 15 x 4 3/4 inches

Compare the PMC-80 with other 16K memory micros in its class.

ATARI® PERSONAL COMPUTER SYSTEMS THAT GROW WITH YOU

Start with a better computer.

Atari computers have built-in capabilities you can't even add onto many other personal computers. Three programming formats (ROM cartridge, disk and cassette). A 57 key upper/lower case ASCII keyboard with 29 keystroke graphics symbols. 128 colors and hues. Four separate sound channels and a built-in speaker. Four controller ports. A built-in RF

© 1980, Atari, Inc.

Ⓜ A Warner Communications Company
Atari reserves the right to make changes to products or programs without notice.

modulator and FCC approval for connection to any TV. Plus, nationwide Atari Authorized Service Centers. And more.

Add memory. The ATARI

800™ is supplied with 16K of memory. You can expand up to a full 48K of RAM with 8K or 16K Memory Modules™ you install yourself.

In less than a minute. The ATARI 400's™ 8K of RAM may be expanded to 16K at Authorized Service Centers. Both may be expanded to 26K of ROM with slip-in ROM cartridge programs.

Add peripherals. The ATARI 410™ audio-digital program recorder. Single or dual density* disk drives. The ATARI 800 individually addresses up to four drives. Add the ATARI 850™ RS232 Interface Module. Add high speed 40 or 80-column printers. Add an acoustic modem for remote data access. Add a light pen.* And there are more Atari peripherals on the way.

Add programs. Choose among dozens of programs in Atari's rapidly expanding software library. Programs categories include:

- Personal Finance & Record Keeping
- Personal Interest & Development
- Professional Applications
- Education
- Information & Communication
- Entertainment
- Programming Languages
- Small Business Accounting

Add it up. With Atari, you start with more. And you can build to more. Because Atari offers you personal computer systems that grow with you. Ask your Atari retailer to give you a full demonstration of Atari computers, peripherals and programs. Complete systems. Because when other people were thinking hardware and software, Atari was thinking systems.

FEATURES & TECHNICAL SPECIFICATIONS

Console: FCC approved, with built-in RF modulator. Connects to any TV.
CPU: 6502 Microprocessor. 0.56 microsecond cycle. 1.8 MHz.

Color: 16 colors, each with 8 intensities

Sound: Four independent sound synthesizers (in addition to audio through TV) for musical tones or game sounds. Four octaves. Variable volume and tone. Internal speaker.

Memory: 16K bytes of Random Access Memory is included. The ATARI 800™ may be expanded up to 48K RAM with user-installed 8K or 16K Atari Memory Modules. The system includes a 10K ROM Operating System. ROM may be expanded up to 26K with user-installed solid-state cartridge programs.

Keyboard: 57 full-stroke alphanumeric keys plus 4 function keys. Upper/lower case. Inverse video. Full screen editing. Four-way cursor control. 29 keystroke graphics.

I/O: Serial input/output port for simple connection to peripherals. Four controller jacks for joystick and paddle controllers and light pen.

Language: Atari BASIC 8K ROM cartridge is included.

Display: Highest graphics resolution 320x192. 24 lines of 40 characters. Three text modes.

Power: AC transformer. UL approved.

Dimensions: 16"x12½"x4½". 9¾ lbs.

Warranty: 90 days parts and labor.

Service: Available at more than 100 Atari authorized service locations. The ATARI 800™ is shipped with a BASIC language ROM cartridge, an operator's manual, a BASIC programming book, 1 3-ring binder, the ATARI Newsletter, an AC power transformer and TV switch box.

Upon return of the warranty card, the user receives valuable reference materials and new issues of the newsletter.
